## Canadian Growth Stronger than Expected, Poloz to Raise Rates in September

- The global outlook is largely unchanged from our <u>July forecast</u>. Global momentum remains generally strong though trade-related risks remain quite significant. Our baseline view remains that trade tensions will fade in time as the damage of escalating trade tensions becomes evident to the White House. Despite President Trump's claim that he is a free-trader, he appears to be a protectionist at heart and clearly views commercial relations in terms of winners and losers. Given this perverse view of trade, the risks of a damaging trade war are not as low as they should be. We remain of the view (see <u>NAFTA: Steeling Ourselves for the Macro Costs of Tariffs—June Update</u>) that a dramatic escalation of trade actions could trigger a global recession. It is a low probability, high impact event.
- Even as trade uncertainty remains elevated, developments in Canada have generally been more positive than anticipated. We are increasing our model-based growth forecast for 2018 to 2.2%, from the 2.0% we predicted in July. Against the background of a very strong US expansion, incoming data suggest the Canadian economy has been more resilient to Trump policies than we had assumed: business investment appears stronger than earlier thought. Capacity pressures and job shortages likely account for this stronger-than-expected dynamic. Consumption is also stronger than thought despite rising interest rates and declining confidence. We attribute that largely to strong gains in disposable income, fueled by continued strength in the labour market and rising wages.
- Given the improved outlook, we now expect that the Bank of Canada will raise rates more rapidly, with the next increase in September, followed by another in December. We have not changed our view on the total amount of tightening required by end-2019, which remains 100 bps above current levels. The shift we now foresee simply brings forward some of that tightening. Growth will remain well above the BoC's estimate of potential this year, and we now forecast that core inflation, as defined by the average of the three measures used by the BoC will peak at 2.3% rather than the 2.2% we predicted in our last update. These factors add to what is clearly a more hawkish stance by Governor Poloz, in which he now argues, among other factors, that the BoC will only respond to negative developments if they occur.
- Markets appear to be significantly underpricing the odds of additional monetary policy tightening in Canada through the middle of next year. Developments in trade policy as well as the evolution of key economic indicators will naturally influence our thinking as we get closer to September. If the situation unfolds as we expect, we think Governor Poloz will be compelled to raise rates in September even if market pricing hasn't adjusted by then.

This report has been prepared by Scotiabank Economics as a resource for the clients of Scotiabank. Opinions, estimates and projections contained herein are our own as of the date hereof and are subject to change without notice. The information and opinions contained herein have been compiled or arrived at from sources believed reliable but no representation or warranty, express or implied, is made as to their accuracy or completeness. Neither Scotiabank nor any of its officers, directors, partners, employees or affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

These reports are provided to you for informational purposes only. This report is not, and is not constructed as, an offer to sell or solicitation of any offer to buy any financial instrument, nor shall this report be construed as an opinion as to whether you should enter into any swap or trading strategy involving a swap or any other transaction. The information contained in this report is not intended to be, and does not constitute, a recommendation of a swap or trading strategy involving a swap within the meaning of U.S. Commodity Futures Trading Commission Regulation 23.434 and Appendix A thereto. This material is not intended to be individually tailored to your needs or characteristics and should not be viewed as a "call to action" or suggestion that you enter into a swap or trading strategy involving a swap or any other transaction. Scotiabank may engage in transactions in a manner inconsistent with the views discussed this report and may have positions, or be in the process of acquiring or disposing of positions, referred to in this report.

Scotiabank, its affiliates and any of their respective officers, directors and employees may from time to time take positions in currencies, act as managers, co-managers or underwriters of a public offering or act as principals or agents, deal in, own or act as market makers or advisors, brokers or commercial and/or investment bankers in relation to securities or related derivatives. As a result of these actions, Scotiabank may receive remuneration. All Scotiabank products and services are subject to the terms of applicable agreements and local regulations. Officers, directors and employees of Scotiabank and its affiliates may serve as directors of corporations.

Any securities discussed in this report may not be suitable for all investors. Scotiabank recommends that investors independently evaluate any issuer and security discussed in this report, and consult with any advisors they deem necessary prior to making any investment.

# This report and all information, opinions and conclusions contained in it are protected by copyright. This information may not be reproduced without the prior express written consent of Scotiabank.

™ Trademark of The Bank of Nova Scotia. Used under license, where applicable.
